SUMMARY

I have 2.5+ years experience as a front-end developer, focusing on creating user-friendly and visually appealing web interfaces. I thrive on overcoming challenges, showcasing my creativity, and staying up-to-date with the latest technologies to improve my work. My goal is to ensure a seamless user experience, not only in terms of design but also in delivering positive results for businesses. I aim to leave a lasting impression on users.

EXPERIENCE

Frontend Developer

TechKun

Jul '25 — Present

Bhopal, MP, India

- Architected and delivered a full-featured e-commerce platform from scratch — owning the entire frontend: UX research, Figma wireframes, component architecture, API integration, and mobile-responsive implementation across all breakpoints.
- Engineered a library of reusable React components and custom hooks — leveraging modern UI systems like shadcn/ui to build consistent, accessible components, while abstracting complex logic such as data fetching, authentication state, and form handling into clean, composable hooks that significantly reduced boilerplate
- Spearheaded R&D initiatives — evaluating new libraries, frontend patterns, and AI tooling to inform technical decisions, reduce technical debt, and keep the team aligned with modern industry standards.
- Owned end-to-end UI/UX design — producing user flows, interactive Figma prototypes, and scalable design systems that served as the single source of truth for design-to-dev handoffs.
- Applied optimization techniques like lazy loading to reduce page size and load times, enhancing the user experience.
- Implemented an atomic design framework in React, creating a reusable and scalable UI component library integrated with shadcn/ui principles for consistency and faster development.

Frontend Developer

Infomover Technologies

Feb '24 — Jun '25

Baroda, Gujarat, India (Remote)

- Proficient in React Tailwind CSS Library, specializing in creating Theme variations and implementing pixel-perfect designs from Figma.
- Demonstrated expertise in writing efficient, well-documented code using TypeScript and ES6, ensuring codebase maintainability and scalability.
- Designed and developed the marketing website for the workforce monitoring platform, including creating its image content on Canva and overseeing its implementation in Next.js.
- Contributed to a client project for a Singapore-based company, developing a pixel-perfect, responsive design using Salesforce Lightning Web Components (LWC) as the framework, based on a detailed Figma layout
- Created a mobile app using React Native for the time monitoring application, providing easy access to software information on mobile devices.
- Started with 'atoms' like Button, Input, Toggle Button, Dropdown, and many others, then composed 'molecules' such as Form Fields, each built using props for customization.
- Created a scalable design system with reusable components to ensure consistency and maintainability.

SKILLS

Frontend Technologies HTML, CSS, JavaScript (ES6), Typescript, React Native, ReactJS, Material UI, Bootstrap, Tailwind CSS, Rest API, Shadcn UI

UI Frameworks Material-UI, Prime React, Prime Flex, Bootstrap, Tailwind CSS, Shadcn UI, Nativewind, NativeBase

Databases MongoDB, Supabase Database, MySQL

Design Tools Canva, Figma, UI/UX, Stitch

Version Control Git, Github

Languages English, Hindi, Urdu

EDUCATION

B-Tech in Artificial Intelligence & Data Science, Jai Narain College of Technology

Jan '21 — Dec '25

Bhopal, MP, India
